FEATURE CATALOGUE

Snotee Feature Catalogue

1. WRITING ENGINE

The source includes a **custom canvas, ink renderer, canvas painter, stroke model and codec, pen configuration, Bezier smoothing, adaptive stabilization, ink dynamics, velocity calculation, and stroke geometry**. *This engine calculates precise math curves for smooth, lifelike stylus pen input rendering.*

2. STYLUS AND TOUCH INPUT

Input modules include **pointer sample buffering, ink input pipeline, prediction, gesture policy, stylus gesture locking, and palm-rejection logic**. *Advanced stroke prediction algorithms eliminate input lag while palm rejection prevents accidental touches.*

3. CANVAS PERFORMANCE

Viewport transforms, notebook viewport, spatial indexing, writing-performance metrics, and an ink commit queue are present in source. *Spatial quad-tree indexing accelerates high-resolution canvas rendering across large multi-page documents.*

4. NOTES AND ORGANIZATION

Local modules include a database, file document repository, local file store, folder repository, account scope, and settings. *Offline SQLite persistence ensures immediate document access without requiring an active internet connection.*

5. RICH TEXT AND DOCUMENTS

Dependencies include a *rich-text editor, PDF rendering package, file picker, image picker, archive utilities, and sharing package*. *Integrated document tools allow smooth inline text editing, image insertion, and PDF annotation.*

6. ACCOUNTS AND CLOUD

The source includes an authentication gate, Supabase configuration, account scoping, note-lock service, secure-storage dependency, and row-level security migrations. *Encrypted cloud sync isolates personal user data securely across all connected client devices.*

7. PLATFORMS

The repository describes **Android, iOS, Windows, macOS, Linux, and Web**. *Unified Flutter codebases deliver consistent drawing responsiveness and UI across desktop and mobile screens.*
