SNOTE DOCUMENTATION

Snote Terms of Use

Plain-language terms template for using the project and its services.

APPLICATION: Snote Note-Taking Platform

FOUNDER & CREATOR: Sadab

SHOWCASE WEBSITE: snote-showcase.vercel.app

SOURCE REPOSITORY: github.com/shinuXcode/Snote

TERMS OF USE

Snote Terms of Use

1. SCOPE AND ACCEPTANCE

These terms are a starter document for the Snote project and are not legal advice. The project operator should obtain jurisdiction-specific legal review before treating this text as binding terms. By using a build, you should review its release notes, applicable store terms, and any separate service terms. *Users automatically consent to operational terms upon downloading or launching the application client.*

2. SOFTWARE AND CHANGES

Snote is **open-source software**. The repository **LICENSE** governs copyright permissions for the code. Features may change between versions, and the project may publish updates, remove features, or discontinue a build. *Modular software updates continually introduce upgraded drawing utilities and enhanced cloud performance.*

3. USER CONTENT AND BACKUPS

You remain **responsible for content you create, import, export, or synchronize**. Keep independent backups of important notes. Do not use the app as the only copy of critical records. Do not upload content you lack permission to store or share. *Local export options allow users to preserve offline notebook archives independently anytime.*

4. ACCOUNTS AND CLOUD SERVICES

Cloud and account functionality depends on optional configuration and third-party providers. You are responsible for keeping account credentials private. Availability, retention, and deletion may depend on the configured service and its policies. *Encrypted authentication mechanisms securely protect personal account profiles against unauthorized cloud access.*

5. ACCEPTABLE USE

Do not use the project to violate law, infringe others' rights, distribute malware, attempt unauthorized access, or interfere with services. Respect third-party licenses and applicable platform rules. *Strict compliance guidelines preserve network integrity and protect shared cloud storage environments globally.*

6. WARRANTY AND LIABILITY

The **MIT license** includes warranty disclaimers. This summary does not replace the full license or create a guarantee of uninterrupted availability, data recovery, fitness for a specific purpose, or security certification. *Software is provided standard as-is, placing operational data stewardship on end-user configuration.*

7. UPDATES AND CONTACT

Read the release notes when upgrading. Report defects through the official repository and *do not include private note contents, credentials, or access tokens*. *Community bug reports help developers refine stroke rendering precision and fix unexpected issues.*
